

Pattern Printing Directions

Most of the downloadable versions of my patterns come with both a full sized drawing of the appliqué pattern and a letter sized version that can be enlarged at your local copy center.

You can print the full sized patterns on standard letter sized paper if your home printer has a “Poster Print” setting. Here are the directions to do this:

- Open the PDF document
- go to the page that is the full sized drawing
- click File>Print
- In your Print menu click “Print Current Page”
- If there is a Page Sizing & Handling section, select “Poster”

This will print the pattern on multiple letter size sheets which you will then have to tape together.

If your printer does not have these settings, check the manual to see if there is a poster print option. If not, an enlargeable pattern is provided that you can take to your local copy center for printing.

This same process can be used for printing the full color appliqué directions included with your pattern.
